Subject: RE: TN20 Renewal request and Report Revision

Hi Rafael,
Good Catch. There were indeed instructions that the manufacturer supplied. They are located in the supplemental folder and are labeled "TN20 REV B OPERATING INSTRUCTIONS". I have updated the language in the report and updated the C of C. Please see link below to the revised report.

Ex. 4 CBI

Please let me know if you have any issues accessing the report.

John,

Thank you for the link. In your test report, you have the following statement:

Process Operations and Description:

The appliance was operated according to procedures as described in the Operations Manual. Detailed run information can be found in corresponding digital folders submitted with this report.

Please confirm that no MFG instructions were provided to the test lab.

Importance: High

Dear Dr. Sanchez,
Attached is the formal request from Pacific Energy for a waiver from certification testing to renew the model TN20 Series B under EPA Certificate #80-17. We have reviewed the data provided and confirmed that no changes to any k-list components have been made that would affect combustion. We recommend a renewal of this certificate. Upon review of the original report we have made some minor revisions and issued a new Certificate of Conformity for your review. See attached. The full revised reports with all associated data can be found using the link below.

☐ [Pac Energy TN20 B Series Renewal](#)

Please let me know if you have any issues accessing the data in this folder.

Kind Regards,

John Steinert
